How to Fill Out your Logbook

Our Dear Candidate,

The activities included in this Logbook summary and required to be documented and approved are: surgical Procedures, Scientific Activities, Training Courses, Rotation Schedule and the Research Abstract.

Filling out this Logbook:

All cells in each table should be filled out with the relevant data.

Surgical Procedures:

You need to document each procedure you participated in and the level of contribution, according to the following “Four Point Scale”:

S1	Primary Surgeon
A1	First Assistant Surgeon
A2	Second Assistant Surgeon
O	Observer

* In some training hospitals, trainees are not allowed to do major surgical operations independently. However, they may have done the major part of surgery. In such a case it could be accepted that this resident indicates that was S1. (The candidate is solely responsible for the accuracy of the information submitted and it will be reviewed by the Arab Board).

* The candidate should update the Logbook daily as the cases are performed and should be reviewed by the Program Director every six months.

Academic Activities:

You are required to participate in one scientific activity weekly. For every scientific activity, you will document the number of the sessions you attended during the training program, the event (Morbidity & Mortality Meeting – Journal Club – Audit....etc.). Conferences which you attended and participated in, are documented in this session.

Training Courses:

The candidate should document the courses attended as BLS, ATLS, Basic Surgical Skills, Basics of Laparoscopy, Research Methodology, Evidence Based Medicine, Presentation Skills, in addition to any other courses completed.

Rotation Map:

The candidate should document the General Surgery and other specialties' rotations during the training program. The documentation includes the specialty, the hospital(s) where the rotation was performed, start/end dates, the name and signature of the Program Director.

Research Abstract:

The candidate needs to write down one abstract of his/her research in 250-350 words. The abstract should include the research title, background, methods, results and discussion and the conclusion. The candidate should strive to publish the research in a scientific Journal or present in a scientific conference.

Remarks:

All pages of this Logbook Summary must be SIGNED by TRAINER and COUNTER SIGNED by the PROGRAM DIRECTOR.
